

# Preface

Thanks to “ALLAH” Almighty, Who enabled me to present the book “Web Engineering With PHP Programming”. This book designed for the beginner, the very beginner. In fact, it assumes that you know nothing about computer programming or Web Development.

It gives us information pleasure to put this Theory with practical example book PHP Web programming in the hand of (FSC) Intermediate Computer Science, (DAE) Diploma in Computer Science and Software Engineering. This book can be used in (BS) Computer Science and information Technology also.

This book has been written to meet the requirements of students getting in Web development. The present Web server installation, fundamentals of programming technique and syntax of PHP language version above 5. The PHP is one of the most powers full and wonder full programming language for Web Development beginners.

This book dedicated to my Whole family,

Specially my Mother and Father.
